quality control

Scales and weighing systems

Dini Argeo, a company which has been producing scales and weighing systems since 1846, has been registered since 02/04/1906 at the Registry of Metric Manufacturers provided by the Royal Decree nr. 226 of 12/06/1902.

Dini Argeo is a company specialising in the design and manufacturing of scales and weighing systems worldwide-known for quality and reliability.

The solutions created by **Dini Argeo** are suitable for any industrial weighing application:

- reading, collection, processing and transfer of weight data
- simple, sequential, simultaneous dosage, in-loading or unloading, single or multicomponent dosage, continuous dosage on belt conveyors or loss-in-weight feeding.
- Weighing in areas endangered by potentially explosive atmospheres (ATEX)
- piece counting, labelling
- control of production lines, statistical check of prepackaged products
- logistics weighing (pallet scales, pallet truck scales, weighing forks for lift trucks, crane scales)
- vehicle weighing (weighbridges, wheel weighers, static and dynamic axle weighers).

A full range of interfaces and communication protocols is available as standard thus making Dini Argeo products easily integrable into industrial automation and processing for the development of OEM systems with customisable functions.

Dini Argeo has obtained the Quality Management System certification according to the UNI EN ISO 9001: 2008 for the design, manufacture and after sales service in respect of measuring instruments, scales and weighing systems, components and software.

Dini Argeo produces approved or approvable instruments for a legal-for-trade use following the European regulation EN 45501 and the directive 2014/31/EU.

The metrological marking indicates that the instrument is covered by a type approval certificate, released by an european notified body, that validates the idoneity for a legal use. This approval is fundamental for all the instrument legal-for-trade uses, in relationship with third parties.

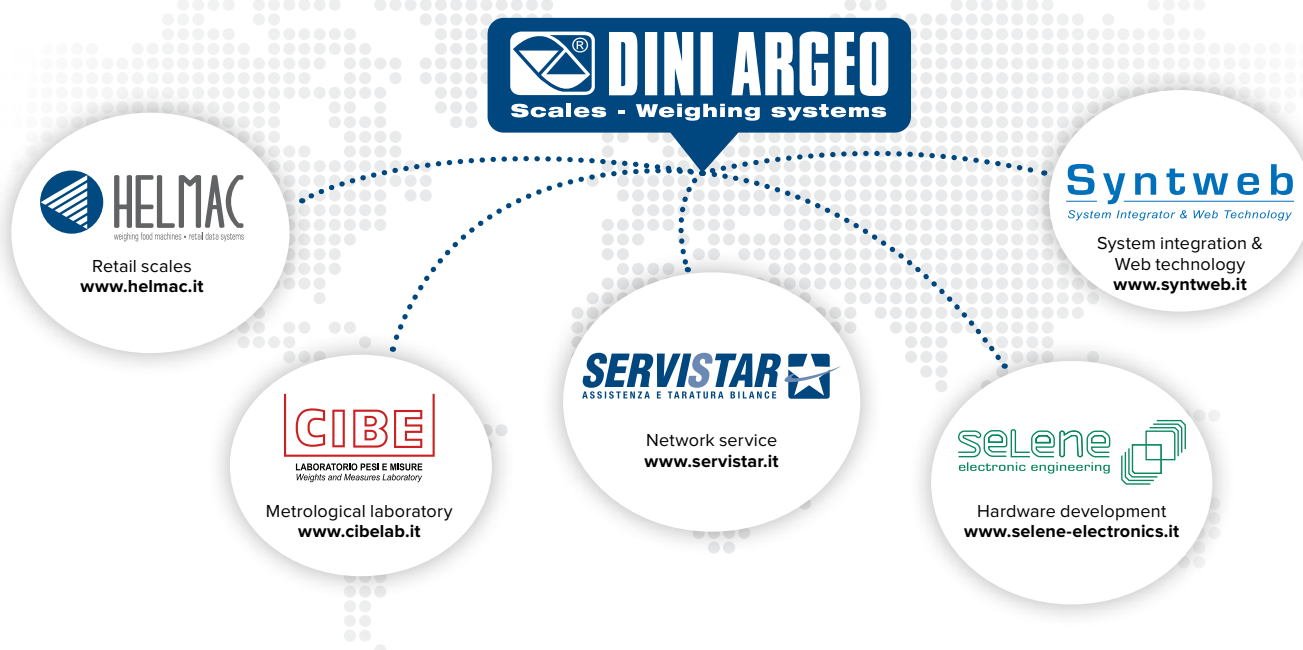

Dini Argeo is an ATEX notified company, in accordance with the 94/9/CE (Annex IV) Directive, since 20/04/2016 with 2014/34/UE directive and therefore authorised to produce and market equipment marked by Ex-symbol intended for use in potentially explosive atmospheres.

Dini Argeo Group

A COMPREHENSIVE SERVICE

Dini Argeo offers the customer a complete service ranging from the working out of customised solutions and supply of weighing components to the development of software for PC and communication networks, calibration and approval services of OEM systems. Dini Argeo has grown into a group with a strong international calling, composed of subsidiaries in Europe and Asia, alongside a distribution and customer service network in more than 70 countries around the world. Dini Argeo works in cooperation with the other companies of the Group, which are market leaders in their specific field of activity:

Dini Argeo manufactures non-automatic weighing instruments in conformity with the 2014/31/EU Directive. The DG0126 mark states the instrument is subject to the EC verification by the manufacturer according to the Certificate of EC approval of the Production Quality Assurance System.

Dini Argeo produces instruments in compliance with the requirements laid down by the recommendations of the International Organization of Legal Metrology (OIML):

- Load cells approved to OIML R60
- Non-automatic weighing instruments approved to OIML R76
- OIML R134 approved dynamic weighers for vehicle transiting at a low speed.
- OIML R51 approved "start/stop" automatic catchweigher on belt conveyors.
- Gravimetric filling instruments approved to OIML R61.

Dini Argeo obtained the GOST-R certification ensuring that its instruments comply with the regulations provided for by the Russian Federation.

TYPE-APPROVAL SERVICES

Scales approved for

LEGAL-FOR-TRADE

OUR LEGAL METROLOGY SERVICES

Those scales which are intended for use in commercial weighing applications where product is sold by weight must have an **APPROVED weighing system** according to EN45501 (not automatic weighing instruments) or to MID (automatic weighing instruments).

The whole range of Dini Argeo products herein marked with a **green M-symbol** are available in CE-M approved versions, certified and suitable for legal-for-trade use.

Each approved system supplied by Dini Argeo may also be equipped with a fiscal memory (alibi memory) which certifies the weight read on the display as well as the weight transmitted to the printer or to the company's IT network.

Type-approval services

Type-approval to
EN 45501 - 2014/31/EU
for non-automatic weighing
instruments

Type-approval to
MID R61
for automatic weighing
instruments on belt conveyors

CALIBRATION SERVICES

A certificate
of calibration,
expression
of certainty in your
measurement

Irrespective of whether weighing instruments are for legal-for-trade use or commercial applications or integrated into production and logistic processes, ascertaining the measurement accuracy is a **guarantee of quality and time-money saving.**

Dini Argeo offers a full range of **calibration services** for weighing instruments in compliance with ISO9001 and ISO17025 standards.

Calibration
services

ISO 17025

Calibration according to
**ISO 17025 (DKD/DAKKS,
SIT/ACCREDIA, UKAS,
COFRAC, etc.)** for scales or
dynamometers

ISO 9001

Calibration according to
ISO 9001
for industrial weighing
instruments

SOLUTIONS FOR ATEX AREAS

DINI ARGEO is a certified company authorised to manufacture and sell weighing instruments intended for use in industrial potentially explosive areas according to ATEX standards.

CLASSIFICATION OF ATEX AREAS

Are there any ATEX areas in your company?

Example of activities

WHICH MAY PRODUCE EXPLOSIVE MIXTURES DURING A PROCESSING CYCLE

	MANUFACTURING AND PROCESSING OF:	Plastic, rubber, paper, leather, fibreglass, glass, wood
	METALLURGY - STEEL INDUSTRY	Iron, aluminium foundries, small metal parts
	CHEMISTRY	Chemical analysis laboratory, pharmaceutical industry, ceramics industry, pesticide production plant, paintings
	WASTE	Landfill sites, incinerators, waste disposal and treatment plants, purification installations
	TEXTILE INDUSTRY	Yarn weaving
	FOOD INDUSTRY	Baking ovens, mills
	BUILDING	Cement factories, electricity in building

The products developed by **DINI ARGEO** cover the majority of industrial weighing applications.

The product categories marked with the **symbol “Ex”** are available in a version suitable for use in ATEX environments.

CHAPTER 1

SCALES

A specific scale
for every need.

LABORATORY SCALES: analytical balances, precision balances and moisture analysers, ideal for use in laboratories, chemical and pharmaceutical industry	PAGE 10
MULTIFUNCTION SCALES ideal for use in production departments, laboratories, retail shops, warehouse and depot, receiving, control and distribution of raw materials, forwarding	PAGE 14
SCALES FOR SPECIFIC APPLICATIONS ideal for use in production departments, goods forwarding and receiving, butchering and seasoning	PAGE 20
AXLE WEIGHERS FOR VEHICLE INSPECTION ideal for use in goods and raw materials receiving and forwarding departments, overloads checking, waste disposal and recycling	PAGE 24
SCALES FOR WEIGHING GOODS ON PALLETS ideal for use in production departments, goods receiving and forwarding, warehouse	PAGE 26
WEIGHING SCALES FOR FORKLIFT TRUCKS ideal for use in production departments, goods receiving and forwarding, warehouse	PAGE 28
WEIGHING SCALES FOR CRANES AND OVERHEAD CRANES ideal for use in production departments, goods receiving and forwarding, warehouse	PAGE 30

Analytical scales for laboratory

Multifunctional high-precision balances suitable for laboratory and industrial use. Paired with an advanced weight indicator, they are ideally suited for microdosing, checkweighing, labelling applications by network data sharing.

A robotised self-calibration system through internal sample weight keeps weighing accuracy unchanged for many years to come.

CAPACITY (g)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV* CE M
120	Ø 80	0,0001	0,001
220	Ø 80	0,0001	0,001

Precision scales

Precision scales ideal for use in laboratory and industrial application. Combined with an advanced weight indicator, they are suitable for microdosing, checkweighing, labelling applications by network data sharing. These scales can be equipped with a manual calibration system through internal sample weight.

CAPACITY (g)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV* CE M

Stainless steel precision scales

Their stainless steel partial or complete structure makes these scales ideal for use in harsh environments requiring strict hygiene. Especially designed for statistical check of pre-packaged products or microbatching.

CAPACITY (g)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV* CE 
320	Ø 140	0,01	0,01
620	Ø 140	0,01	0,01
3200	190x190	0,1	0,1
6200	190x190	0,1	0,1
8200	190x190	0,1	0,1
15000	190x190	0,1	1
22000	400x350	0,1	1
32000	400x350	0,1	1

Moisture analysers

These high-precision balances are suitable for determining the moisture content in materials through a special halogen lamp drying system.

CAPACITY (g)	DIVISION (g)
	STANDARD
60	0,001
210	0,001

Stainless steel laboratory scales

High-resolution precision scales ideal for laboratory and chemical/pharmaceutical industry. Entirely made of stainless steel, they are protected against dust, damp and water moisture. A RED LED display simplifies reading even in low temperature environments.

CAPACITY (kg)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV*
2/10	190x220	0,1/1	-
6,5	190x220	0,1	-
3/6	190x220	-	0,5/1
6/12	190x220	-	1/2

Compact scales for laboratories and industry

Watertight compact multifunction scales, particularly suitable for industrial laboratories and burdensome working environments.

Characterized by their compact dimensions and ergonomic design, they are fully realized in aluminium alloy, in order to guarantee sturdiness and weighing precision.

The innovative integrated calibration weight allows to check periodically the correct functioning of the scale.

CAPACITY (kg)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV*
6000	190x190	0.1	1

Stainless steel compact scales with LCD display

These scales are characterized by the big dimensions of the loading plate, which allows to weigh fruit crates, packages and cumbersome objects easily. The colour LCD display integrates the check weight function, changing the colour according to the weighing result (scarce, good or abundant).

CAPACITY (kg)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV*  
15/30	250x340	5/10	5/10

Compact stainless steel scales with touch screen display

Evolved version, specific for applications such as counting, manual dosage, labeling and statistic control of prepackaged goods. This scale offers use simplicity and a wide range of interfaces, in order to communicate with the main computer devices.

Moreover, it offers the possibility to connect additional bench scales, floor ones, or very-high precision scales for sampling of little dimensions components.

CAPACITY (kg)	PLATE (mm)	DIVISION (g)	
		STANDARD	APPROV*  
3/6	250x340	0,5/1	0,5/1
12/30	250x340	2/5	2/5

Bench scales for small objects

Scales equipped with a round pan, suitable for weighing small objects. The removable stainless steel “double face” pan is easy to clean and the spirit level level and the adjustable supporting feet allow for a correct installation also on inclined shelves.

CAPACITY (kg)	PLATE (mm)	DIVISION (g)		
		STANDARD	APPROV*	HIGH RESOL.
1,5	Ø 178	0,2	0,5	0,05
3	Ø 178	0,5	1	0,1
6	Ø 178	1	2	0,2
15	Ø 178	2	5	0,5

* On request, depending on the model: multi scale: 3000+3000e, 6000e, 6000+6000e

CH. 2 Go to chapter FUNCTIONALITY and choose **the indicator** most suited to your needs!

Compact portable scales

Extremely versatile scales, easily transportable and ideal for instant weighing anywhere. Especially valued by the agricultural industry to weigh fruits and vegetables during harvest or in warehouse for inventory or stocktaking. They also allow to save weighing readings to a USB flash drive for further processing.

The structure is entirely made of AISI 304 stainless steel.

CAPACITY (kg)	PLATE (mm)	DIVISION (g)		
		STANDARD	APPROV*	HIGH RESOL.
6/15	365x235	2/5	2/5	0,5

Portable multi-platform weighing system

Range of complete multi-balance compact weighing stations, designed for optimising the installation of the weighing system, thus allowing to save space and to simplify the system handling in the working area. Available in painted or STAINLESS steel versions.

PLATFORM ON UPPER SHELF (mm)	PLATFORM ON LOWER SHELF (mm)
230x330, 330x330	400x400, 400x500, 500x600, 600x600

ACCESSORIES

Floor support columns

Made of painted steel or stainless steel, they are lightweight, easy-to-handle as well as firm-based and sturdy. Ideal for use in industrial environments. Due to removable adjustable feet they can be firmly put on any kind of surface, fixed to the floor or, by replacing the feet with simple castor wheels, easily moved for instant weighing anywhere.

HEIGHT (mm)

800

Columns and brackets for compact solutions

Easy-to-install, firm-based and robust, they make the system compact and easy-to-handle. The columns are especially used for lifting up the indicator to a higher position, protecting it against dirt, dust and moisture.

COLUMNS HEIGHT (mm)

350, 500, 700

Painted or STAINLESS steel raising frames for platforms

Suitable for raising the load platform, facilitating weighing operations. Available in painted or STAINLESS steel versions.

FOR LOAD PLATFORM (mm) HEIGHT (mm)

400x400	600
600x600	600

Fixing brackets for weight indicators

Made of STAINLESS steel, they allow you to easily fix the indicator to the wall or to any vertical surfaces. Available also with adjustable inclination.

1. Adjustable inclination bracket.
2. Weighing platform in-built bracket.
3. Fixed inclination wall bracket.

Frames for flush-floor installation

Mounted directly inside the pit, they optimise the installation of the platform for a correct operation. Available in painted or STAINLESS steel versions.

FOR LOAD PLATFORM (mm)

600x600, 1000x1000, 1000x1250, 1250x1250, 1250x1500, 1500x1500, 1500x2000, 1500x2500, 2000x2500

Ramps for floor scales

Suitable for non-pit mounted platform to move up/down pallet trucks and hand powered forks. A special system allows for fixing it to the platform or to the floor. Available in painted or STAINLESS steel versions.

RAMP SIZES (mm)

1000x900, 1250x1100, 1500x1100

Scales for iron and metal sheet weighing

Scales suitable for weighing metal section bars, rods, tubes and metal sheets in industrial and commercial applications.

Standard version manufactured pursuant to OIML R-76 / EN 45501 regulation. Weighing platforms available also in CE-M APPROVED version.

Wall quarter-weighing scales

These scales offer the possibility of weighing quarters by using a load platform or a weighing hook. Manufactured in compliance with the requirements provided for by the regulations on equipment to be installed inside food environments they consist of hypersanitizable AISI 304 stainless steel structure and approved watertight oversized load cell ensuring sturdiness and durability over time.

WEIGHING KITS

These weighing kits enable to turn any rigid structure into an accurate and high-performing weighing system. Each model is especially designed to meet any precise requirements: weighing of tanks, silos and hoppers as well as of belts and roller conveyors, platforms and also suspended loads such as: big bags, beams or section bars, etc.

Kit for high-load capacity systems (silos, hoppers, tanks, cisterns)

Compression load cells and assembly kit composed of watertight stainless steel accessories easy-to-install under the structure being weighed.

CAPACITY (kg)	SIZE (mm)
250, 500, 1000, 2500, 5000, 7500, 10.000, 15.000	175x150xh96
30.000	230x200xh118
50.000, 100.000	320x320xh154

Kit for medium-load capacity systems (silos, hoppers, tanks, cisterns, belts, platforms)

STAINLESS steel shear beam load cells and assembly kit made of galvanised steel easy-to-install directly under the structure being weighed.

CAPACITY (kg)	SIZE (mm)
300, 500, 1.000, 2.000	180x120xh110
3.000, 5.000	215x120xh150

Kit for low-load capacity system (fillers, hoppers, tanks, cisterns, big bags, screw batchers)

Bending beam load cells and assembly kit in STAINLESS steel easy-to-install directly under the structure being weighed.

CAPACITY (kg)	SIZE (mm)
10, 20, 50, 100, 200, 300, 500	135x70xh86

Kit for suspended loads (big bags, hoppers, tanks)

Tension load cells and swivel eyebolts easy-to-install on lifting systems.

CAPACITY (kg)	SIZE (mm)
10, 20, 50, 100, 200, 300, 500	135x70xh86

Continuous weighing kit for belt conveyors

This kit allows to integrate a weighing area directly into the structure of the already existing conveyor belt for a real-time measuring of the quantity of material conveyed, hourly flow rate and total weight.

The kit can be used with any kind of idle roller.

BELT WIDTH (mm)	HOURLY FLOW RATE

Dynamic Weighing

The basic model consists of two portable platforms and the weighing electronics in a practical case.

Static and dynamic axle weighers

These axle weighers are ideal for use in all those applications requiring a quick and easy weighing of on-road vehicles such as: vans, lorries, tank trucks, transporters, tractors, waggons, etc.

Especially suitable for a mobile and temporary use; their light weight, easy transport and placing allow to create in a very short time a weighing station on any kind of flat surface with a considerable time-money saving.

Multiplatform wheel scales

These wheel weighing platforms allow to weigh the whole vehicle in a single operation with high accuracy approved for legal-for-trade use.

The wheel weighing system consists of a number of platforms corresponding to the number of wheels of the vehicle being weighed and is equipped with a fixed or portable indicator displaying the weight of any wheel, axle, total weight and barycentre coordinates.

This wheel weighing system offers a considerable space-time saving and is ideal for a fixed as well as mobile or seasonal use.

Electronic modular weighbridge

This weighbridge is a valuable product able to combine high loading capacity and high-accuracy weighing, keeping them intact and unchanged for many years to come.

All wearing parts are oversized and made of quality materials thus ensuring the highest performance under harsh working conditions. The weighbridge is capable of taking on a daily weighing of dozens laden vehicles for the whole year, trouble-free.

As standard it also offers an automatic double division of the reading, which allows for a more accurate weighing of contained loads while keeping unchanged the high loading capacity.

A new concept of weighbridge

This cutting-edge weighbridge is easy to install and does not require any special lifting equipment or masonry works which can perennially take up space on the courtyard.

Compared to standard models, this weighbridge has an important advantage: it can be moved from the area of use in order to create a new weighing station elsewhere or also be removed (seasonal use).

This feature is especially appreciated in building, in port areas, in farming.

Special hooks on request.

Weight repeaters

A full range of weight repeaters available in wall, bench or portable versions, also fitted with a built-in printer, used to display the weight from far-off distance, to perform the functions of a dynamometer and to print receipts or labels or to save all working data on a USB flash drive. They are also useful for weighing bulky items, lifted-up and weighed through more crane scales.

Calibration certificate

Each dynamometer can be supplied with a certificate of calibration performed in laboratory with deadweights that ensures the proper operation and expected performances. In addition, Dini Argeo offers a periodic maintenance service of the crane scale according to the safety standards in force.

A certificate of conformity to the European Machinery Directive, namely to the Directive 2006/42 EC, EN 13155 is also available on request.

FUNCTIONALITY

Many functions, added to weighing.

By virtue of a 100-year experience and with presence in more than 70 countries worldwide, Dini Argeo offers a full range of weight indicators with specific functions created starting from our customers' requirements, thus being able to meet every need, from a simple weighing to a customised application.

One indicator, many functions.

MULTIFUNCTION WEIGHING program

Weight indicators of the multifunction range allow for quickly choosing the requested operating mode among those available. Any application mode offers functions and simple procedures to expedite and facilitate everyday work.

Horizontal totalisation	The function “totalisation” is useful for knowing the total weight of more consecutive weighings. For example it is suited to verify the load of a pallet before forwarding or the filling of tanks or the load of vehicles.
Formulation - Vertical totalisation	The “formulation” function simplifies the implementation of recipes or mixtures with known weights. Once the component is added, by pressing the dedicated key, the weight is summed up and reset. All components are then mixed and a summarising receipt can be edited at the end. The versions fitted with an enhanced keyboard can use digital IDs to identify the added product.
Pieces - quantity counting	The “pieces-counting” function is suitable for quickly knowing the quantity of pieces contained in a package, or for filling containers by picking up a certain number of pieces from the stock. The pieces-counting function allows for counting thousands of pieces quickly and accurately thus saving time and money.
Percent weighing	The “percent weighing” function is ideal when there is the need of creating mixtures with a variable total quantity, while keeping constant the percentage of each product. This function is very easy-to-use: set the total amount to be performed equal to 100.0%. The scale will show the percentage of the component in real time in order to amount to the correct percentages for each component. Percent checks can also be carried out by entering 100.0% as a reference value and verifying the deviation of successive weighings.
Weight checking	Weighchecking means to compare the weight of an object placed onto the scale with a pre-set reference value. Effectively, the reference weight can be quickly set by programming it through the keyboard, or putting it onto the pan and pressing the button concerned, and the tolerance range within which the verified weight shall be considered as compliant.

FOR SPECIFIC APPLICATIONS

CE

BATTERY AND PRINTER

- Attached printer protected from dust and moisture
- **STAINLESS** steel enclosure
- IP68 degree of protection for industrial use
- Rechargeable battery
- ATEX/EX versions
- Attached printer
- IP65 protection for industrial use
- **Wide range of options**
- Rechargeable battery

WHEEL AND AXLE WEIGHER

- **Easy Axle program specific for axle and wheel weighing**
- Rechargeable battery
- Transport protection case
- Integrated printer

EASY AXLE Program

Program especially developed to easily weight any type of vehicles: axle weighing mode as well as wheel weighing mode.

- Single wheel load check
- Single axle load check
- Calculation of total weight
- Printing of any weight data, complete with barycentre coordinates, date and time and two freely programmable digital IDs.

WHEEL WEIGHER

AXLE WEIGHER

CE

WEIGHBRIDGE

- **Easy Weighbridge program specific for weighbridge**
- Rechargeable battery
- Attached thermal printer or
- Continuous-mode label printer

EASY WEIGHBRIDGE Program

It includes all basic functions for managing a weighbridge and printing receipts:

- File archive up to 30 vehicle known weights (tares), quickly recallable, rapid weighing in a single operation
- Storage up to 99 input weighings and identification through automatic CODE
- Calculation of the net loaded/unloaded weight through difference between input and output weighing
- Input /output quick weighing
- Printing of input, output weights and difference
- Printing of a list of all partial weighings
- Printing of a single weighing ticket customisable with company name, weighing ID, date and time, etc.

Reference carrying out to set the average unit weight.

Place on the platform the total quantity being counting.

FOR AUTOMATION

- STAINLESS steel enclosure IP68 watertight
- **Adjustable inclination bracket as standard**
- Integrated 3-colour semaphore for weight checks
- **Panel-mounting, it can be easily integrated into existing industrial automation**
- Digital inputs and outputs as standard

PORTABLE

- **Rack version indicator, fitted with handy case and protection for portable weighing systems**
- Integrated printer
- Long-life battery

BOX FOR OUTDOOR USE

- AISI 304 STAINLESS steel box fitted with weight indicator and in-built ACCESSORIES, suitable for outdoor installation in harsh industrial environments
- The inner space allows the installation of electrical components such as: relays, remote control switches, etc.
- Also suitable for weighbridges and self-service applications

ASK FOR A CUSTOM-MADE PROGRAM

Dini Argeo offers its customers complete customised programs according to the requirements and many custom-made solutions which are perfectly compatible with any existing systems.

COMMUNICATION INTERFACES, PRINTERS AND ACCESSORIES for weight indicators

The functionality of weight indicators can be strengthened through a full range of available ACCESSORIES.

DATA TRANSFER TO PC AND PORTABLE DEVICES

A wide range of communication interfaces between scale and company's computer system, necessary for real-time sharing of file archives and weighing data

In addition, they allow to use the SPECIFIC INDICATORS APPs in tablets and smartphones.

WI FI

BLUETOOTH

ETHERNET

RADIOFREQUENCY VIA USB OR RS232

USB

ANALOG OUTPUT

RS232 / RS485 / RS422

ETHERNET / MODBUS/PROFIBUS

OPTICAL FIBRE FOR COMMUNICATION IN ATEX AREA

WEIGHT REPEATERS

They repeat the scale weight or data also at far distances, indoors as well as outdoors. The connection can be via cable or radio.

For advanced applications, multiple repeaters can be network connected

Find out more on www.diniargeo.com

PRINTERS AND LABELLERS

Impact, dot-matrix or thermal printers for printing of receipts and reports on thermal paper roll, continuous form or card. Direct thermal or heat-transfer labellers for printing of labels up to 100x120mm with any type of bar code.

BUILT-IN PRINTERS

DIRECT THERMAL LABELLERS

HEAT-TRANSFER LABELLERS

DOT-MATRIX PRINTERS

IMPACT PRINTERS

THERMAL PRINTERS

CONFIGURABLE TICKETS

WEIGHING STORING

USB FLASH DRIVE

The USB flash drive is useful to store all weighings carried out by the scale for a further processing and storage on PC. It can store months of continuous work without ever have to download the data to a PC.

5.000.000 weighings!

System for weighing totalisation applications, fitted with one scale or multi-balances, for the management of file archives, added-up totals and configurable printouts.

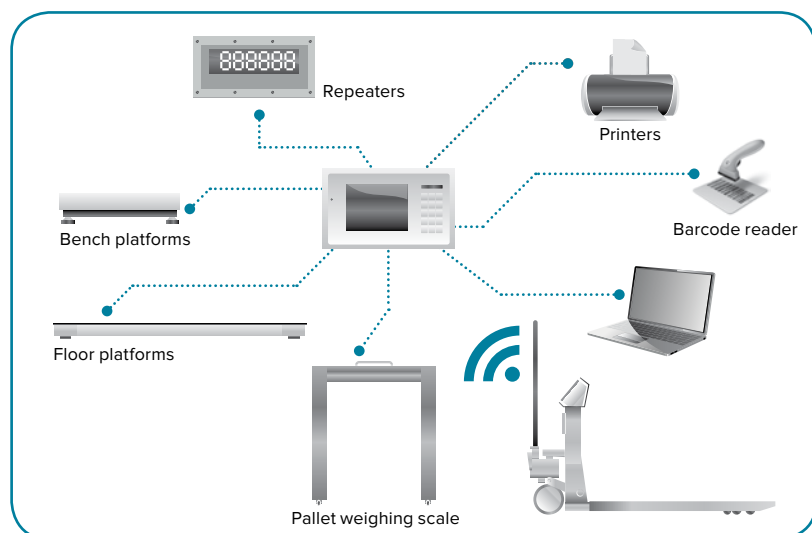

This system can be paired to one or more bench and floor scales thus creating a weighing station and data management capable of storing any operation carried out, adding-up more weighings by calculating the total, printing receipts and labels with any kind of barcode and transferring all reports to the PC via Ethernet or WiFi.

FEATURES AND MAIN FUNCTIONS:

- Multi-balance manual or automatic totalisation
- Labelling, printing of receipts and packing list
- 4 stand-alone totalisation levels, updated at any weighing (usable for example as total of carton, pallet, shift and total per item)
- Print list of the last 1000 weighings
- File archives: 1000 items, 200 customers, 300 tares, expandable
- 15 texts freely programmable by operator (batch, code operator, shift, etc)
- Connectable up to five independent scales
- Alibi Memory protocol for applications legal-for-trade through PC
- Rapid selection of an item through barcodes reading.

System for piece-counting applications with totalisation and labelling functions.

Piece-counting system designed for counting applications and warehouse management, required for packaging of small parts, inventories and stocks tracking. High accuracy and counting resolution and online items storing, each with average unit weight, pre-tare and quantity control thresholds.

FEATURES AND MAIN FUNCTIONS:

- Multiscale quantity counting functions (pieces, liters, Newton, meters, etc.), during loading and unloading
- Rapid input of the reference quantity/Average Unit Weight /Conversion coefficient
- Counting automatic optimisation
- Weight and quantity totalisation
- Dosage in pieces, in loading or unloading
- 4 totalisation levels, stand-alone
- File archives: 1000 items, 200 customers, 300 tares, expandable
- 15 texts freely programmable by the operator (batch, code operator, shift, etc.)
- Automatic selection of the item through barcodes reading.

System for weighbridge management with checking function of input/output goods and updating of file archives simultaneously.

Modular solution for a complete management of one or more weighbridges, with receipts, labels or notes on continuous form printing. The input/output function allows to monitor the quantity of unloaded and loaded material and to share data with the company's information system.

FEATURES AND MAIN FUNCTIONS:

- Weighing of a vehicle with or without trailer
- Operator-assisted or self-service weighing
- Input/output weighing storing through ID code or TARGA (999 open weighings)
- Connectable to two independent scales, with possibility of input/output weighing on the first or second scale
- Function A + B for scale 1, 2 or totalisation displaying
- Management of vehicles with trailer also on 2 scales
- Management of ANALOG or DIGITAL load cells
- File archives: 15 ID texts, 500 customers, 500 products, 500 vehicles, expandable.

page 56

System for advanced statistical checking applications as to pre-packaged products as provided for by Directive No.76/211/EEC.

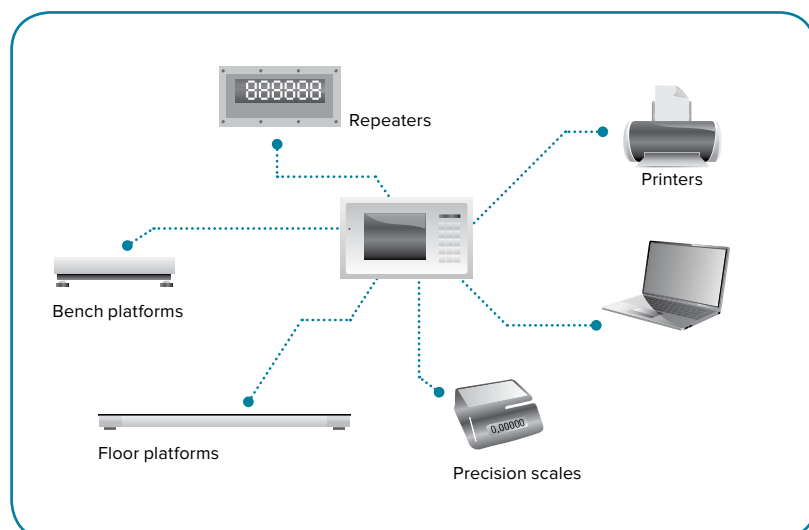

Modular solution with one balance or multiscales offering the advantage of checking prepackaged products having a different weight by using the same system. The weighing program has been developed so as to perform all major statistical or integral checks as requested by the regulations in force, or can be customised according to specific needs, also for internal use.

FEATURES AND MAIN FUNCTIONS:

- Statistical check functions, selectable as CUSTOMISED (for indoor use) or according to LAW (as provide for by Directive No. 76/211/EEC):
 - DESTRUCTIVE or NON DESTRUCTIVE examination
 - Criterion of acceptance/rejection of the batch under examinatio
 - Calculation and printing of the batch report and of the standard deviation
- Control of the quantity in ml by entering a density coefficient for each item
- Simultaneous management of up to 10 production lines
- File archives: 15 ID texts, 1000 items, expandable
- Connectable up to 4 stand-alone scales.

SOFTWARE
INFO
page 56

System with advanced weighing/pricing function, PLU management and item traceability.

This solution allows to manually label a lot of packages in a very short time, with indication of the ingredients, traceability, date of packaging, expiration date and any kind of barcode.

The system is able to print labels by means of ANY TYPE of ASCII LABELLER (Italora, Epson, Datamax, Zebra, Citizen, TSC, etc.) and can be adapted to the existing computer system.

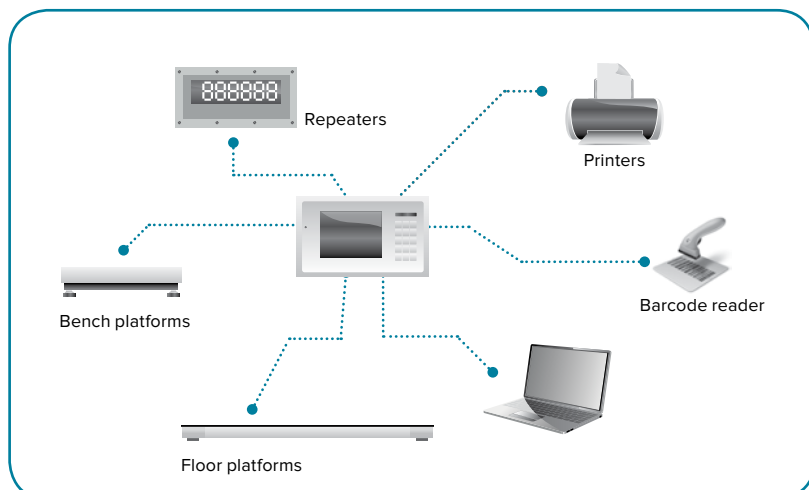

FEATURES AND MAIN FUNCTIONS:

- Weighing /pricing functions:
 - Calculation and displaying of price and amount
 - Fixed or variable weight operation
 - Dual currency management with conversion factor
 - EAN product code management and checkdigit calculation
 - Product traceability
 - Ageing and expiration date management
 - Totalisation of weight and amount
- Up to 5 levels of independent totals
- File archives: 1000 items, 200 customers, 300 tares
- Connectable up to 4 stand-alone scales.

WEIGHING AND MANUAL DRIVEN BATCHING

CH. 1	APPLICATION FIELD	CH. 2	FUNCTIONALITY	MULTIFUNCTION AND SPECIFIC INDICATORS	PROGRAMMABLE INDICATORS	ACCESSORIES	SYSTEMS	CH. 3	SOFTWARE
-------	-------------------	-------	---------------	---------------------------------------	-------------------------	-------------	---------	-------	----------

System for weighing and manual batching by formulas and guided correction function of a mixture in case of overdosing.

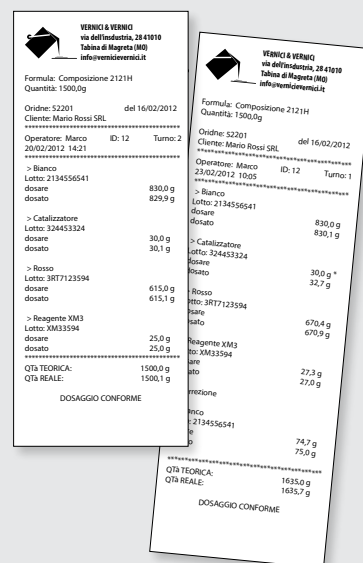

Solution especially designed to assist the operator in creating solid as well as liquid multi-component mixtures, thus reducing considerably errors and wastefulness, thanks to a clear on-screen messaging and to the correction function of the out-of-tolerance dosage.

FEATURES AND MAIN FUNCTIONS:

- File archive: 500 recipes, expandable
- File archive: 200 components, each with free descriptions, target range and max admissible error
- From 1 to 20 components per formula
- File archive: 15 texts freely programmable by operator, such as: shift, batch, operator code, comment, etc.
- 3 different operating modes:
 - **FIXED TARGET:** the weights of each component are preset in the recipe
 - **PROGRAMMABLE TOTAL TARGET:** the percentage of each component is specified in the formula. Before starting batching, the operator sets the total amount to be weighed out. The balance recalculates the weight of each component automatically according to the pre-set percentage
 - **FIRST COMPONENT recalculation:** the percentage of each component is specified in the formula. The operator weighs out the requested quantity as to the FIRST COMPONENT and the balance calculates the weight of the components to be added according to the pre-set percentage
- Automatic wizard correction of any overdosing
- Optional management of stocks, with shortage alarm per component
- Multiscale weighing-out, with automatic scale change.

VEHICLE WEIGHING AND BARYCENTRE CHECKING

CH. 1	APPLICATION FIELD	CH. 2	FUNCTIONALITY	MULTIFUNCTION AND SPECIFIC INDICATORS	PROGRAMMABLE INDICATORS	ACCESSORIES	SYSTEMS	CH. 3	SOFTWARE
-------	-------------------	-------	---------------	---------------------------------------	-------------------------	-------------	---------	-------	----------

EXAMPLE OF WIRELESS OPTION

Multi-platform system for vehicle weighing and checking, with calculation of the barycentre coordinates.

Modular portable solution, battery-operated, designed for the creation of wheel weighing stations, suitable for weighing any type of vehicle as well as objects with more support points.

The cased weight indicator is equipped with a printer printing weighing receipts including all vehicle weight data, the weight of any wheel, axle, vehicle total weight, gross, tare, net weight and barycentre.

FEATURES AND MAIN FUNCTIONS:

- Multi-scale wheel weighing operating mode with 4 reading channels (for 4 independent platforms)
- Calculation of the barycentre coordinates of vehicles, trucks, aircrafts, containers, etc.
- Simultaneous display of the load of each wheel, axle and total weight
- Archives: 15 ID texts, 1000 memories for vehicle, customers, materials management
- Possibility of managing up to 16 platforms.

CHAPTER 3

SOFTWARE

A program for each weighing application.

In every company where weighing is the core of the business, the PC programs developed by Dini Argeo are essential for integrating the weighing system into the production process, real-time sharing of all weight data, with time-money saving and reducing operational errors considerably, through simple wizards and intuitive procedures, tailored to every requirement.

SPECIFIC PROGRAMS for weighing applications

PAGE 58

All the programs are available for traditional PC as well as for TOUCHSCREEN PC.

Programs developed for simplifying weighing management...

COUNTLESS ADVANTAGES:

Flexible and versatile installation: thanks to the configurable data interchange module, each program can interface with **any already installed management operating system** for stocks updating/stocks integrated management, downloading of production orders, forms, item database, customer database, etc.

Complete management of the orders placed by a customer, thanks to customisable wizards, enhanced by automatic or manual controls thus ensuring quality.

Dispatch of the order, by printing the transport document both on paper and electronic format, also with automatic transmission to the customer.

Fast and safe automatic updating of the management operating system, without any manual operation required.

... and data integration.

ALL THIS WILL RESULT IN:

HARD AUTOMATION
of the production process thus
minimising errors, wastefulness
and implementation times.

Easier integration of accessories such as barcode
readers, palmtops, smartphones, tablets and all the
latest communication technologies, in order to be
always at the forefront.

Integration of weighing systems in a same working
area, or at different sites, locally, nationally or
worldwide with centralization of the collected data.

Rapid and safe management of large data flows:
It will no longer be required to input large amounts of data,
since there is a real-time data interchange at any weighing
and all information is available online, accessible from
anywhere, also from web platforms.

LABELLING, TRACEABILITY AND BATCH MANAGEMENT

Items, PLU, ingredients, clients uploading by management system

Driven-execution of the orders to be fulfilled

Packaging and labelling with all data and barcodes

Full traceability of the product as well as of the batch

Real-time issuance of documents

PIECES COUNTING, ORDERS AND STOCKS MANAGEMENT

Driven-execution of the orders to be fulfilled

Counting, packaging and labelling

ODETTE-type labels of any format

QR Codes (Data Matrix)

Real-time issuance of documents

MANUAL ASSISTED BATCHING, ERROR CORRECTION AND STOCKS CHECKING

Centralised formulation

Driven execution of formulas

Stock control and management with alarm in case of shortage

Assisted correction of overdosages to reduce material wastefulness

Real-time issuance of documents

MULTI-STATION STATISTICAL CHECK FOR PRODUCTION LINES

Integral check of the batch

Statistical check according to the standard 690/78

Packaging quality control

Real-time monitoring of all production lines

Printing of any batch report and total report

GOODS LOADING/UNLOADING CHECK AND STOCKS UPDATING

Monitoring of the input/output material flow

Stocks updating

Video surveillance of the weighbridge and all operations carried out, with automatic detection of the plate and images of the load and the weighed vehicle

Issuance of documents in real time, with fiscal memory of the performed operations

WASTE SEPARATION AND DISPOSAL

Archives shared management as to users, database, job-orders, types of waste containers, customers, departments, batches, labels or other customisable data according to client's requirements

Waste traceability

Management and printing of configurable batch covering labels, with the possibility of writing in logos, images, barcodes, etc.

SUPERVISION OF WEIGHING SYSTEMS AND DATA COLLECTION

Collection and recording of all weighings carried by each on-line weighing systems for further processing

Data format completely CUSTOMISED with addition of free texts written up by operations during weighing operations

PRODUCTION CONTROL / QUALITY CONTROL / SORTING

Specific program for weighing and control of products conveyed on production lines

In addition to checkweighing, the program asks the operator for a visual verification of all the control criteria requested, freely programmable (i.e. packaging integrity, viscosity, colour, etc.)
